

**TROPICAL CYCLONE BULLETIN NO. 20**

**Typhoon BETTY (MAWAR)**

Issued at 11:00 PM, 31 May 2023

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TYPHOON BETTY CONTINUES MOVE NORTHWARD OVER THE SEA EAST OF TAIWAN						
<b>Location of Center (10:00 PM)</b>						
The center of the eye of Typhoon BETTY was estimated based on all available data at <b>450 km East Northeast of Itbayat, Batanes (22.8°N, 125.6°E)</b>						
<b>Intensity</b>						
Maximum sustained winds of <b>120 km/h</b> near the center, gustiness of up to <b>150 km/h</b> , and central pressure of <b>970 hPa</b>						
<b>Present Movement</b>						
<b>Northward at 10 km/h</b>						
<b>Extent of Tropical Cyclone Winds</b>						
<b>Strong to typhoon-force winds</b> extend outwards up to <b>550 km</b> from the center

## TROPICAL CYCLONE BULLETIN NO. 20

### Typhoon BETTY (MAWAR)

Issued at 11:00 PM, 31 May 2023

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

#### TRACK AND INTENSITY OUTLOOK

- Typhoon BETTY will gradually accelerate throughout the forecast period. After moving northward or north northeastward between tonight and tomorrow, the typhoon will then turn east northeastward as it makes a close approach or landfall over the central Ryukyu Islands (i.e., Okinawa Is.). On the track forecast, BETTY will be outside the Philippine Area of Responsibility (PAR) by tomorrow evening or Friday early morning.
- BETTY is forecast to steadily weaken throughout the forecast period due to cooler ocean waters (caused by upwelling of cooler waters in its wake), dry air intrusion, and increasing vertical wind shear. The typhoon may be downgraded into a severe tropical storm tomorrow and into a tropical storm on Saturday, although a faster weakening rate remains a possibility.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
